A KISCO Company

Free Seminar:

Parylene Coatings Provide Advanced Protection

Specialty Coating Systems invites you to a half-day seminar offering industry expertise on coating with the unique polymer Parylene. This interactive seminar will present multi-industry coating topics designed to address some of the most common surface modification challenges facing the electronics, transportation, aerospace, defense and medical device industries. It will also introduce SCS' new halogen-free variant, ParyFree®.

The following seminars are currently being offered:

- **October 14, 2019:** Pilsen, Czech Republic
- **October 16, 2019:** Dortmund, Germany
- **October 17, 2019:** Weingarten, Germany

FREE SEMINAR, REGISTER TODAY!

Seating at the seminars is limited, so do not delay. Registrations close October 7, 2019.

To register, visit www.SCSseminars.com.

Learn about Parylene's...

- Moisture barrier properties
- Thermal capabilities up to 450° C (short-term)
- Resistance against almost all chemicals
- Dielectric withstanding to 7,000 V at 25 microns
- Waterproofing capabilities per IPX7, IPX8
- Dry-film lubricity competing with PTFE
- Biostability and biocompatibility for medical implants

Discover why Parylene is used in...

- Coronary stents, pacemakers, electrosurgical tools, infusion systems and more
- Industrial electronics
- Avionics electronics
- Transportation electronics
- MEMS and semiconductor fabrication devices
- Consumer electronics ... and many more applications
